# Evolution of IC and way forward

- Already in the first six months of existence, IC has evolved to be an anchor of a growing community of healthcare and allied professionals of more than 25000 in number
- IC has built knowledge products like books, International conference, webinars and magazine to document the tacit knowledge of the community and shape the healthcare dialogue in the country with a quest for '**innovations in healthcare**' and achieving its vision of '**healthcare delivery at an optimum cost**'
- As a by product of the engagement with the community and providing thought leadership. IC has multiple requests from the community:
  - from start-ups/investors to short circuit their match making in the health sector . Hence, IC is able to build a close knit network of innovators and committed investors. IC has created a [Linkedin Group](#) to further facilitate the stakeholders. ([InnoHealth: Fostering Innovations](#))
  - Market access request from foreign/domestic players. The global network of IC has been very much the foundation of these interventions
  - IC is commissioning training modules on hot topics like e-health and Innovation
- IC further looks to build a high impact product in a years time, leveraging the strengths in IT and healthcare to impact home healthcare and other healthcare delivery models
